Creating Confidence

# BPS<sup>®</sup> C2-3<sup>evo</sup><sup>®</sup>

Outstanding performance  
with advanced flexibility

G+D's class-leading tabletop banknote processing systems take another step forward with the new generation BPS C2-3<sup>evo</sup>. Designed to handle high volumes with greater efficiency and cost-effectiveness, this value counter features an enhanced singler for all substrates and banknote qualities, along with a newly optimized transport path for smooth, reliable processing.

Three output compartments enable flexible sorting options, including by denomination, orientation, or fitness. With a maximum throughput of up to 1,200 banknotes per minute enabled by dynamic singling, productivity is significantly increased. Best-in-class sensors ensure reliable authentication and fitness detection, while the redesigned GUI and optional GUI mounting make operation easier and more intuitive than ever.

The new generation BPS C2-3<sup>evo</sup> is ideal for commercial banks, CITs, casinos, and other organizations that require peak performance with proven flexibility.

# Future-ready performance, built on a legacy of reliability

## Maximum efficiency

The BPS C<sup>evo</sup> offers extensive processing options for a user-tailored operating experience. With the optional Config Optimizer, operators can easily adjust system configurations to streamline workflows and optimize banknote sorting. Intuitive light guidance and newly structured, clear menus support fast, confident operation.

## Enhanced security

Security is a top priority in today's cash-handling environment. The BPS C<sup>evo</sup> runs on a resilient Linux-based software platform, recognized for its stability and security. Encrypted communication protocols protect sensitive data, while intelligent automated processes reduce operator interaction and minimize the risk of human error or fraudulent interference.

## Superior performance with unmatched flexibility

A high-performance processor accelerates processing and enables quick menu navigation with shorter reaction times. Drawing on years of global field

experience across all substrates and banknote qualities, the optimized singler and transport path significantly reduce jams and rejects, resulting in higher, more consistent throughput.

## Future proof

Your business demands efficient processes and systems that evolve with changing requirements. The BPS C<sup>evo</sup> provides the scalability and flexibility needed to meet today's operational needs while remaining ready for future challenges.

# 1,200

banknotes per minute

With dynamic singling, the new generation BPS C2-3<sup>evo</sup> enables fast, accurate counting, sorting, authentication, and serial number reading, helping teams process more cash in less time.

## TECH FACTS

### Speed:

1,050 BN/min

### Dynamic singling:

(depending on banknote format)  
up to 1,200 BN/min

### BN formats (length x width):

100–181 x 60–85 mm

### Multi-currency:

up to 40 currencies

### Mixed currency:

up to 10 currencies

### Singler capacity:

(depending on BN quality)  
up to 1,000 BN

### Output compartment capacity:

(depending on BN quality)  
up to 250 BN

### Reject compartment capacity:

(depending on BN quality)  
up to 100 BN

### Dimensions (H x W x D):

62 x 33 x 43 cm

### Weight:

~ 32 kg

### Temperature range:

15°C – 35°C

### Electrical specifications:

10–240 VA, 50/60 Hz

### External connections:

1 x LAN, 4 x USB host,  
1 x USB device

### Certificates:

CE, GS, CB
